

International ZIM Cooperation Network

German-Polish Cooperation

Supported by:

on the basis of a decision
by the German Bundestag

For safe medical devices and procedures

ZIM=Germany's largest innovation programme for small and medium-sized enterprises

International ZIM Cooperation Network

Project Start:

1 April 2018 (Phase 2 ends on 31.05.2021)

Network Partner:

13 companies and 3 research institutions from the medical technology and related fields from Poland and Germany

Objective:

Develop transnational technically innovative medical devices as well as treatment methods. In particular through the intelligent exploitation of new opportunities in the field of information and communication technologies (ICT) and ultrasound technology.

The new developments should enable better diagnoses and individualized therapies as well as reduce side effects and increase patient and user safety.

www.prosafemed.com

Network vision and goals

Initiate and implement R&D projects in the network that take into account the regulatory requirements for medical devices (MDR) during their development.

Jointly develop innovative medical devices and processes that improve patient and user safety.

Picking up on trends in medical technology especially digitalization and individualization and placing new products and processes on the market.

To sustainably strengthen the competitiveness of small and medium-sized enterprises (SMEs) in the medical technology sector and related areas.

Improve the quality of life of patients and reduce the burden on the healthcare system through network innovations.

Creation of a transnational exchange of experience and transfer of knowledge and technology.

International ZIM Cooperation Network

16 Network Partner

Bundling of competencies in the fields of

Medical software solutions / ICT

Ultrasound technology

Medical aspiration

Orthopedic aids and appliances

Clean room technology

Technology-related services

Clinical studies

Polymer processing

Measurement systems
